Education

Polytechnic University of the Philippines   2022 - Present

Bachelor of Science in Computer Science

Projects

Arf & Meow Co. — HTML, CSS, SQLite, Bootstrap, and Laravel

A responsive web-based product catalog with CRUD functionalities, built using HTML, CSS, Bootstrap, and Laravel, with SQLite as the database. Designed exclusively for internal staff to manage inventory, update listings, and maintain product data through a clean, efficient interface.

Animalandia — HTML, CSS, JS, C#, Bootstrap, and ASP.NET

A C# ASP.NET MVC application featuring a clean, responsive interface for browsing animal-related content. Built with Razor views, HTML/CSS, and Bootstrap, it emphasizes structured routing, modular design, and an intuitive gallery and info-driven layout.

NightQuest — HTML, CSS, and JS

A front-end web project designed for educational engagement across Science, Technology, History, and Mathematics categories. Developed using HTML, CSS, and JavaScript to deliver an interactive, theme-based quiz experience with modular navigation and responsive layout.

FinalRep — HTML, CSS, and JS

A responsive static site developed to promote an international streetlifting competition, featuring event schedules, registration details, venue information, and judge profiles. Built using HTML, CSS, and lightweight JavaScript to ensure clarity, responsiveness, and accessibility.

Namnam — HTML, CSS, and JS

A front-end project showcasing responsive design and user experience, featuring a modern twist on Filipino cuisine. Developed using HTML, CSS, and JavaScript to highlight menu items, gallery, and brand storytelling.
